

340B COUNTER™

A customizable 340B solution for both covered entities' in-house split-billing and contract pharmacy program

A successful 340B contract pharmacy program has many moving parts. Ensuring that 340B drugs are used only for patients who meet specified eligibility requirements — especially in mixed-use environments, where both 340B eligible and ineligible patients are served — can be challenging and administratively burdensome. 340B COUNTER™ facilitates and manages inventory and replenishment in these complex environments.

- Interface to major wholesalers to support customized ordering processes
- Provides full inventory management, replenishment and reconciliation
- Enables you to perform filtered and detailed reporting and analysis for complete script history, financial breakdowns and qualification details
- Configure with our strategic partners split-billing software, integrate with existing custom/off-the-shelf split-billing systems, and integrate with drug wholesalers purchasing/inventory systems

Driving consistency, compliance and value in everything we do. Wellpartner optimizes 340B program value through: contract pharmacy administration services, multi-vendor audits, a 3-way split-billing solution, and a leading technology for tracking, reporting and self-auditing.
